Read more...iWorksheets: 5Study Guides: 1Vocabulary: 2Ecosystems, Food Chains and Food WebsUnderstanding food chains and food webs requires an understanding of the flow of energy and food sources among living beings on Earth. A food chain represents a series of connected organisms from where they get their energy. A food web is made up of many different food chains in an ecosystem. A food web helps us understand how organisms are interrelated within an ecosystem. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 5Bacteria and VirusesBacteria are prokaryotes, meaning that their DNA is in the cytoplasm because they don't have a nucleus. In addition to not having a nucleus, bacteria also do not have many of the other structures found in a eukaryotic cell. However, they still meet the criteria for being a living organism. There are three different forms of bacteria: spiral, rod, and spherical shape. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 4Introduction to PlantsAll plants are eukaryotes, with numerous cells, and all are autotrophic, use photosynthesis to make food. Plants require sunlight to produce food.: Plants have adapted to live on the earth by having the ability to get water and other nutrients from the soil. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 5Photosynthesis and BreathingWhat is Photosynthesis? Photosynthesis is the process that green plants use to capture energy from the Sun and convert it into food. Plants produce oxygen and food in the form of sugar during the process of Photosynthesis. It happens in two stages. The first stage occurs when light is captured by chlorophyll pigments in the leaves and converted to energy in the chloroplast. more...iWorksheets: 3Vocabulary: 3Protists and MushroomsWhat is a protist? The protist is the most diverse Kingdom of classified organisms on Earth. The protists combine combine combine The same kingdom because they are all eukaryotes and live in a liquid environment. Protists are single-celled and multicellular. Read more ... Worksheets: GuAas of 4 students: 1 Vocabulary: 6 Energia y energia The energka meAnica is the energka of a moving object like an aviAn in flight. Energetic or thermal energy: When a sidewalk heats up from the sun, it now has thermal energy. The energy speaks for itself. Every time you use electricity, your energy is being used. Chromic energy is the energy that is released when chromic links are broken. Electromagnetic energy is energy that travels in waves. Read more ... Worksheets: GuAas of 3studios: 1 Vocabulary: 2 Energy: Forms and changes of energy can have many forms, including metamic energy, iA@rmica, the metamic, the nuclear, and the electromagnetic. Energy potential = energy potential + energy The thermal energy is the energy of an object created by the movement (coinage energy) of its parts (moles and volumes). Chromic energy is the potential energy that is stored in chromic links. The energy is produced by the movement of charged particles called electrons. Read more ... Worksheets: 3 Vocabulary: 3SoundSound is the objects of energy they produce when they vibrate. Sound energy is a form of mega-energy. The substance on which sound waves travel is called medium. A medium can be a ^, liquid, or gas. In a longitudinal wave, the parts of the middle move forward and backward as the energy advances. Then the parts come together, it's called ^compression. When the particles are extended, it is called rarefacciA^n. Read more ... Worksheets: 3 Vocabulary: 4forcesforce is a pull^n or a push and its force is measured in units called Newtons and represented by the symbol F. Forces can act in combination^ and produce what is known as net force. Gravity is a type of force that pulls objects between Sa and Earth. Newton's first law is is An object that is at rest will remain at rest and an object in motion will continue in motion. Read more ... iWorksheets: 5 Guides of study: 1vocabulat: 1 manvimentocando is produced movement, there is speed and speed. The speed is calculated by dividing the distance traveled by the time it took to travel. Speed has an additional component. The speed indicates the speed at which an object goes and wherever it goes. Therefore, if two objects have the same speed, but they go in different directions, they will have different speeds. Read more ... iWorksheets: 5 Guides of study: 1vocabulat: 1 He acids, bases and salts is a compound that is defined by its physical and chemical properties. The ones have sour taste and react with metals and polyimic ions called carbonates. A carbonate is a cup loaded with carbon and oxygen utomos. In addition, when proven with blue litmus paper, the red ones return the red paper. A base or hydrogen, as an Efiido, is also defined by its properties. The bases know bitter, they are slippery in touch and become red -paper red shield. An example of a base is NaOH or sodium hydroxide. Read more ... iWorksheets: 5 Guides of study: 1vocabulat: 1mezclas, solutions and compounds mixtures, unlike the compounds, are the physical combination of different substances. Solutions are a type of mix with at least one solute and a solvent. In a solution, the finely dissolved particles of a solute dissolve by the solvent. Read more ... iWorksheets: 3 Guides of Study: 1vocabulat: 1 The chemical in our chemical world literally affects us twenty -four hours a day. At any time of our body, thousands of chemical reactions are happening. All these reactions are controlled by chemical substances similar to catalysts called enzymes. Most of the chemical digestion of the food we eat is done in the intestine arap arap nanibmoc es ,setnerfid sedadeiporp noc soremAlop nos selauc sal ed sahcum ,saicnatsus siAm o sod ed salczem nos sotseupmoc sol .sacitciArp sarenam sahcum ed naduya son senoiiccaer sus y socimAuq sol .opreuc ortseun ed areuF .samizne noc 1 1 :sediuG ydutS 5 :steehskrowi ... siAm reeL .3 aAres aciniAcem ajatnev al ,secev sert acilpitlum al y artne euq azrefu al amot anuq)Am anu is ,olpmeje rop .adartne ed azrefu/adillas ed azrefu = aciniAcem ajatnev .mn 52 ed aAres adazilaer ojabart ed daditnac al ,sortem 5 etnarud ecroF fo snotweN 5 naracilpa es is ,olpmeje nu arap .aicnatsid x azrefu = ojabart :se olucliAc us arap alumrAf al .aicnatsid al ed s@Avart a azrefu al ed ozrefuse le se krowsenihcaM dna krow2 :oiralubacov 1 :sonmulla 5 ed saAuC :ojabart ed sajuH ... siAm reeL .ahcered a adreicuzi ed yojaba a abinra ed socimAla soremAn sus rop sodazimagro nAAtse sotemelele sol .sotemelele sol anedrom acidAirep albat anu ne sodazimagro nAAtse y sotemelele 411 ed rodederla yaH .ocimAuq o ocisAf oilmac nu etnaimed aicnatsus arto anugnin ne ridivid nedeuq es on y airetam al ed arup siAm amrof al nos sociAairep stnemeleleBaT sol y sotnemeIE 1 :oiralubacov 1 :soiduts3 ed saAuG :steehskrowi ... siAm aeL .somalnimoc son euq ne amrof al etnemacitSiArd oiaibmac nah sadnoorcim ed sarodareng seralulce serrot ed seder nazilitu euq seralulce sonof@Aiet sol .acirbmiAlani aAgloncet al ed aerIA le ne se otse ed olpmeje nU .ocigAloncet ollorased led siAm odaitcinenb eresrah ecerap acinArtecele al etnemarale .omusnoc ed seneib ed sopit sol sodot eD .samelbort sortseun a seniculous ranicorprop y sananuh sadnamed sal recafsitas arap aAgloncet al nasu selaidnum soreinegni sortseun ne aAgloncet 2 :oiralubacov 1 :soiduts 3 ed saAuG :steehskrowi ... siAm reeL .sotcudorp serojem sortoson
